BLACK-DRAUGHT THE ORIGINAL LIVER MEDICINE

A sallow complexion, dissiness, biliousness and a coated tongue are common indications of liver and kidney diseases. Stomach and bowel troubles, severe as they are, give immediate warning by pain, but liver and kidney troubles, though less painful at the start, are much harder to cure. Thedford's Black-Draught never fails to benefit diseased liver and waskened kidneys. It stirs up the torpid liver to throw set the germs of fever and ague. It is a certain proventive of cholers and Hright's disease of the kidneys. With kidneys reinforced by Thedford's Black-Draught thousands of persons have dwelt immune in the midst of yellow fever. Many families live in perfect health and have no other doctor than Thedford's Black-Draught. It is always on hand for use in the energency and saves many expensive calls of a doctor. Oranght.
